CIS reported revenue for the 2021 first half of €129.0m, up 11.6% at constant currency from the same period in 2020.

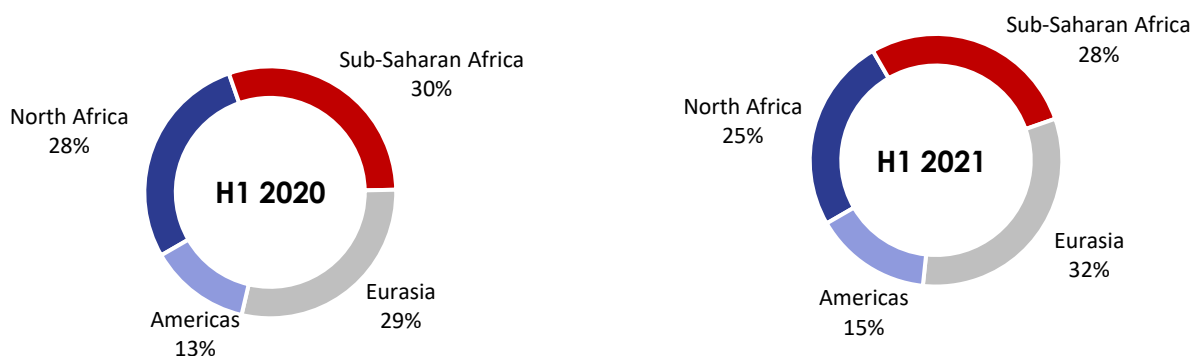

The negative currency effect of €16.3m was more than 40% lower than in Q2 2021. Based on current exchange rates, this amount is expected to decrease significantly over the next few months.

This performance was driven by a very dynamic second quarter, with sales of €66.4m, a significant increase of 19.2% at constant exchange rates compared to Q2 2020.

Additional revenue of over €20.0m in the first half was provided by increasing contributions from our operations and new contracts.

This momentum confirms the positive trend for the Group's businesses in its three main growth regions, namely South America, Eurasia and Africa.
