Strong and continuing growth

Despite the difficult context of the pandemic, CIS reported growth in Q4 2021 sales of 11.7% in relation to the same period in 2020.

Annual revenue rose to €270.7m, a 5.8% increase from 2020. At constant currency, sales grew 11.0% to €283.8m.

This growth in revenue was greatly because of a strong commercial momentum, the ramp-up of numerous contracts and a positive impact from foreign exchange trends in H2 of the year.

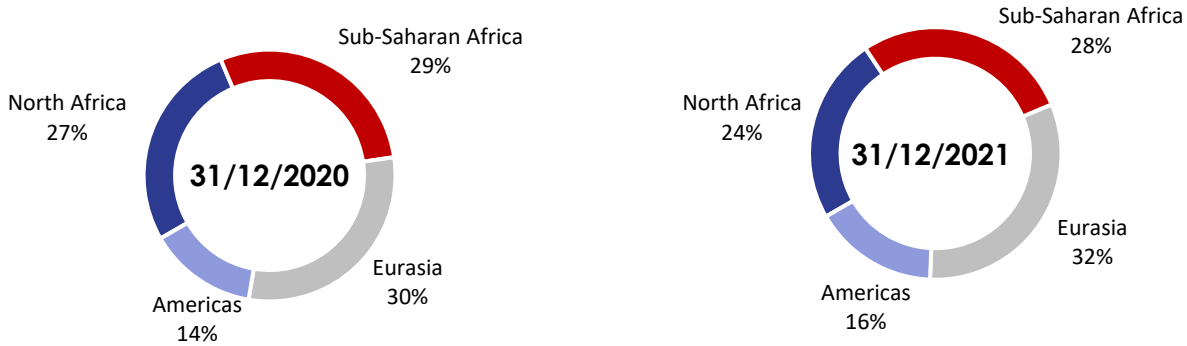

Strong growth in Eurasia and South America

At the level of geographical performances, revenue growth was driven mainly by South America and Eurasia, with gains of 25.4% and 17.9% respectively over the year. Revenue from Africa at constant structure grew 9.3%.

The main growth drivers were Kazakhstan, Brazil, Mauritania, and Russia, where CIS Group strengthened and developed its positions with, local and international, oil and mining players.
