CIS Mozambique provides a new service to its CLN client

CIS Mozambique provides a new service to its CLN client

CIS Mozambique was mandated by its CNL client to provide a new service: cleaning of locomotives and 120 wagons a week for the transport of coal between the Moatize mine and the port of Nacala.

CIS has set up a team of 40 dedicated people to provide a quality service in this new area of expertise that is cleaning and industrial maintenance.

This is another proof of confidence from his CNL client and the quality of the services rendered by his teams in Mozambique.
